

SOC INCIDENT REPORT

Generated: 2026-08-11 20:49:15

Severity	High	Confidence	High
----------	------	------------	------

Incident Overview

Incident ID	INC-2026-0025
Attack Type	powershell execution
Summary	powershell execution activity detected in the security log.
Recommended Tool	create_ticket
Source IP	Not Available
Source Log	C:\Users\SUBODH~1\AppData\Local\Temp\soc_upload_i8am0f5y.log

MITRE ATT&CK; Mapping

Technique ID	T1059.001
Technique Name	PowerShell
Tactic	Execution

Log Profile

Probable Source	Windows event or endpoint log
Format	Plain text
Line Count	39
Contains Timestamp	True
Contains IP	False
Contains URL	True
Contains Process	True
Contains Event ID	True
Contains Hash	False

Defanged Indicators

The values below are intentionally defanged to reduce accidental clicks or execution.

IOC Type	Defanged / Analyst-safe Values
URLs	hxxp://evil[.]local/script[.]ps1
Files	powershell.exe script.ps1
Processes	powershell.exe
Event IDs	4103 4104

Analyst Assessment

Notes	Not Available
Recommendation	Review the affected host, validate the observed activity, and investigate related events before containment.
Policy Reason	Suspicious PowerShell execution indicators were observed, including encoded or expression-based execution.

Threat Intelligence

External enrichment results are read-only and do not automatically blacklist or submit observables.

Observable	Verdict	Risk Score	Provider Status
No observables	No threat-intelligence results were available.	0 / 100	Not available

Deterministic Intelligence Investigation

This section combines VirusTotal, AbuseIPDB, current detection context, and persistent incident memory into a deterministic risk assessment. Provider failures are recorded without stopping the investigation.

Observable	Risk	Verdict	Correlation	Action
hxxp://evil[.]local/script[.]ps1	100 / 100 CRITICAL	confirmed_malicious	HIGH P1	escalate_and_contain

External Provider Findings

Observable	Provider	Verdict	Key Findings
hxxp://evil[.]local/script[.]ps1	Provider status	Partial	VirusTotal enrichment failed: The IOC was not found in VirusTotal.

Intelligence Summaries and Analyst Guidance

Observable: hxxp://evil[.]local/script[.]ps1

IOC http://evil.local/script.ps1 received a risk score of 100/100 and was classified as confirmed_malicious with CRITICAL severity. Assessment confidence is Medium. The IOC is a repeat offender in local incident history. Historical correlation level is HIGH. Historical risk trend is stable. No external threat-intelligence provider evidence was available.

- Review all historical incidents associated with this IOC.

Historical Correlation

Current Incident ID	INC-2026-0025
Historical Incidents Checked	24
Historical Match Found	YES
Matching Incidents	5
Highest Similarity Score	100.0%

Incident ID	Similarity	Match Level	Shared Evidence
INC-2026-0007	100.0%	VERY_HIGH	3 shared IOC value(s) 1 shared MITRE technique(s) 2 shared detection(s)
INC-2026-0008	100.0%	VERY_HIGH	3 shared IOC value(s) 1 shared MITRE technique(s) 2 shared detection(s)
INC-2026-0009	100.0%	VERY_HIGH	3 shared IOC value(s) 1 shared MITRE technique(s) 2 shared detection(s)
INC-2026-0010	100.0%	VERY_HIGH	3 shared IOC value(s) 1 shared MITRE technique(s) 2 shared detection(s)

Multi-Agent Investigation — v0.7.0

This section summarizes the coordinated investigation performed by the root-cause and response-advisory agents using validated evidence from the deterministic SOC pipeline.

Investigation ID	INV-A59104EDFF
Incident ID	INC-2026-0025
Investigation Status	completed
Readiness	complete
Incomplete Tasks	0
Failed Tasks	0
Confirmed Hypotheses	1
Root Cause Available	YES
Response Advisory Available	YES
Participating Agents	7
Evidence Count	3
Evidence Integrity Score	100%
Average Evidence Confidence	88%

Multi-Agent Executive Summary

Investigation INV-A59104EDFF for incident INC-2026-0025 is currently completed. The highest supported severity is CRITICAL. Threat intelligence identified 1 malicious and 0 suspicious observable(s). Historical correlation score is 100/100. Repeat-offender activity was identified. The most probable root cause is: Previously observed malicious infrastructure or recurring attacker activity. The reconstructed attack chain is: Execution. The response advisor recommended 4 action(s), including 0 requiring human approval.

Root-Cause Assessment

Primary Root Cause	Previously observed malicious infrastructure or recurring attacker activity
Severity	CRITICAL
Root-Cause Confidence	100%
Overall Confidence	85%
Probable Initial Access	Malicious script or downloaded payload
Initial-Access Confidence	75%
Initial-Access Evidence	powershell downloadstring

Alternative Root-Cause Possibilities

Possible Cause	Malicious PowerShell or script execution was permitted without sufficient prevention
Confidence	86%
Evidence	powershell encodedcommand downloadstring invoke-expression
Possible Cause	Execution or communication involving confirmed malicious infrastructure
Confidence	82%

Evidence	hxxp://evil[.]local/script[.]ps1 hxxp://evil[.]local/script[.]ps1
----------	--

Reconstructed Attack Chain

Stage	MITRE Techniques	Confidence	Supporting Evidence
Execution	T1059.001	95%	T1059[.]001 - PowerShell Observed behavior: powershell, encodedcommand

Investigation Hypothesis Summary

Total Hypotheses	1
Confirmed	0
Rejected	0
Under Investigation	0
Highest Confidence	Not available
Hypothesis	Primary root-cause hypothesis
Status	confirmed
Confidence	100%
Proposed By	root_cause_agent

Multi-Agent Response Advisory

Severity	CRITICAL
Recommended Mode	monitoring_only
Action Count	4
Requires Approval	0
Confidence	85%

Recommended Actions

Action	create_ticket
Description	Track investigation findings, evidence, decisions, and response progress.
Priority	P1
Human Approval	NOT REQUIRED
Action	notify_soc
Description	Share the CRITICAL investigation outcome with analysts and incident responders.
Priority	P1
Human Approval	NOT REQUIRED
Action	increase_monitoring
Description	Detect repeated indicators, related ATT&CK techniques, and post-containment activity.
Priority	P1

Human Approval	NOT REQUIRED
Action	validate_remediation
Description	Confirm that malicious processes, persistence, communications, and compromised access paths have been removed.
Priority	P1
Human Approval	NOT REQUIRED

Response Orchestration — v0.6.0

This section records the policy decision, planned response actions, approval requirements, ticket creation, simulated execution results, and audit-trail location.

Policy Decision

Operating Mode	simulation
Incident ID	INC-2026-0025
Priority	ResponsePriority.P1
Severity	High
Confidence	High
Combined Risk Score	100 / 100
Intelligence Verdict	confirmed_malicious
Repeat Offender	YES
Correlation Level	HIGH
Decision Reason	Not available

Policy-Recommended Actions

ActionType.CREATE_TICKET

ActionType.NOTIFY_SOC

ActionType.COLLECT_FORENSICS

Response Plan

Plan ID	PLAN-D26E595C4B
Incident ID	INC-2026-0025
Plan Status	completed
Priority	ResponsePriority.P1
Simulation Mode	YES
Created At	2026-08-11T15:19:15.461306+00:00
Updated At	Not available

Planned Actions

Action Number	1
Action ID	ACT-346C638214
Action Type	ActionType.CREATE_TICKET
Status	ActionStatus.SIMULATED
Priority	Not available
Requires Approval	NO
Description	Not available
Reason	Track investigation, ownership, evidence, and remediation. Decision priority: P1; risk score: 100; severity: HIGH.

Target	INC-2026-0025
Action Number	2
Action ID	ACT-F21A22D2A8
Action Type	ActionType.NOTIFY_SOC
Status	ActionStatus.SIMULATED
Priority	Not available
Requires Approval	NO
Description	Not available
Reason	Escalate the incident to the responsible SOC team. Decision priority: P1; risk score: 100; severity: HIGH.
Target	SOC_TEAM

Action Number	3
Action ID	ACT-CA4D5BEB55
Action Type	ActionType.COLLECT_FORENSICS
Status	ActionStatus.SIMULATED
Priority	Not available
Requires Approval	NO
Description	Not available
Reason	Preserve evidence for investigation and incident scoping. Decision priority: P1; risk score: 100; severity: HIGH.
Target	INC-2026-0025

Approval Requests

No approval requests were created for this response plan.

SOC Ticket

Ticket ID	TKT-6708C2324E
Incident ID	INC-2026-0025
Title	[HIGH] powershell execution
Severity	HIGH
Priority	ResponsePriority.P1
Status	open
Created At	2026-08-11T15:19:15.463759+00:00

Simulated Action Execution

Execution Number	1
Action ID	ACT-346C638214

Action Type	create_ticket
Status	simulated
Success	NO
Simulation	YES
Message	Not available
Error	Not available

Execution Number	2
